

**REMARKS**

In the Examiner's reasons for allowance, the Examiner states (portions omitted for brevity):

There is no teaching or suggestion in the prior art to:  
"adjusting measurement circuitry to compensate ... method  
evaluating magnetic memory" as claimed in the independent claim  
12.

Applicant agrees that the art of record does not teach or suggest the recited limitations. The Examiner, however, cited only portions of some claims and ignored limitations from the other allowed claims. Applicant submits that the present claims are allowable for at least the reason that the references of record in the application do not teach or suggest all of the limitations of the claims as recited in the claims themselves. Each claim is allowable in light of the complete language of the claim, as well as equivalents. The Applicant therefore respectfully asserts that the scope of each claim as allowed is to be determined from the actual claim language, including all equivalents.

Respectfully submitted,

Philip S. Lyren  
Reg. No. 40,709
